

NailTrak[®]

Wide and Safe Nailing Area
on CertainTeed Designer Shingles

Seeing is Believing

The new and improved NailTrak nailing line, featured on CertainTeed designer shingles.

Since its introduction in 2004 **NailTrak** has helped contractors install with speed, accuracy, and confidence.

Now **NailTrak** is brighter than ever before, with high-visibility lines that stand out whether it's daybreak or dusk.

NailTrak removes the guesswork with three separately defined lines, creating a large area to guide your nailing and a smaller area for extreme steep-slope applications.

NailTrak[®]
Fast, Accurate, Visible

QuadraBond[™]
Advanced Layering

CertainTeed's specially formulated adhesive laminates shingle layers at four points, more than any other manufacturer. These four adhesive strips bind the layers of each shingle together for increased resistance to wind and weather damage.

Visible any time of day

High-contrast nailing lines in thick, bold definition stand out on shingle colors in any lighting condition.

From your voice to our ears

CertainTeed collects feedback from building professionals across the U.S. and Canada and provides it to our R&D and manufacturing teams to create a superior shingle with the features and benefits that contractors want.

Then we back our products with an industry-leading warranty, as well as powerful SureStart™ protection that fully covers our shingles in the event of a manufacturing defect during the vital early years following installation.

Designed with installers in mind

Some nailing lines are set close to the shim. This can leave nail heads exposed after installation, which creates unsightly 'shiners' that reflect light and detract from the beauty of the roof.

NailTrak is offset from the shim at a distance that helps prevent exposed nail heads when the shingles are installed to manufacturer specifications.

Integrity Roof System[®]

A COMPLETE APPROACH TO LONG LASTING BEAUTY AND PERFORMANCE

With as much care as you take in selecting the right contractor, choosing the right roof system is equally as important. A CertainTeed Integrity Roof System combines key elements that help ensure you have a well-built roof for long-lasting performance.

1. Waterproofing Underlayment

The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.

2. Water-Resistant Underlayment

Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.

3. Starter Shingles

Starter Shingles are the first course of shingles that are installed and designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.

4. Shingles

Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.

5. Hip & Ridge Caps

Available in numerous profiles, these accessories are used on the roof's hip and ridge lines for a distinctive finishing touch to your new roof.

6. Ventilation

A roof that breathes is shown to perform better and last longer. Ridge Vents, in combination with Intake Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.
